

## WOOD PROTECTOR

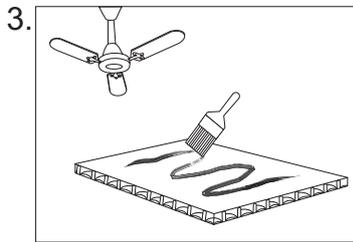

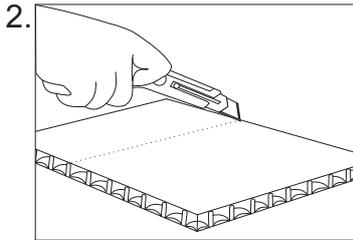

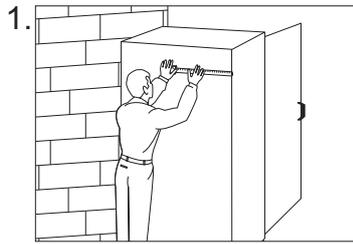

*Introducing a reasonable solution  
for your expensive plywood*

Now save your expensive plywoods from the moisture of the wall. Cello Wim Plast introduces a new range of Wood Protector available in attractive colours. Wood Protector is to be fixed at the back of the plywood of wardrobe, showcase, kitchen cabinets, photo framing, mirror, glass framing which comes in contact with the wall to prevent it from termite & moisture of the wall. Its easy to install. It can be fixed by any layman. No specific tools are required for it. It can be cut with normal cutter also. The sheets are light weight, reusable and very important is **they don't require Paint or Polish**. So ultimately one saves more in buying Wood Protector.

Standard available size is 8ft x 4ft.

# INSTALLATION GUIDE

1. Take the size of the plywood.

2. Cut the cello bubble guard sheet accordingly.

3. Apply special rubber base adhesive (SG 1000 of 3M / SP5 of Pidilite) on sheet as well as on the back side of the cupboard. Allow it to dry for 5-10 minutes.

4. Put the sheet on the back of the cupboard and apply pressure from one end to the other gradually, so that no air bubble remains inside.

5. Hammer the sheet by placing a plain wooden plank as shown in figure for fixing.

And the Water Proof & Termite Proof Wood Protector is ready to protect your expensive furniture from the moisture of the wall.
